# Unlock Efficiency and Ensure Compliance

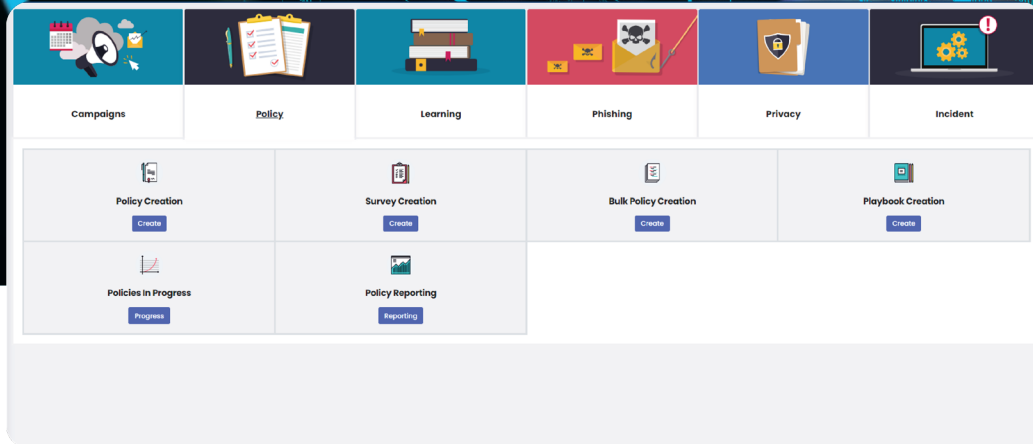

Policy management matters more than ever as the regulatory environment becomes increasingly complex and stringent across industries. Navigating compliance standards, while keeping policies up-to-date and ensuring employee attestation can feel like a never-ending challenge

Organisations must progress beyond passive acknowledgement to ensure that policies are genuinely understood and followed. The quest for a seamless policy management solution isn't just about ticking boxes; it's about safeguarding your organisation and fostering a culture of compliance.

From publishing and delivery to tracking, MetaPolicy is your partner to automate policy lifecycles effortlessly. We believe managing policies and maintaining compliance should be simple. MetaPolicy enables organisations to access audit reporting, gain visibility and highlight areas that require attention before they pose a risk to security and compliance. Using MetaPolicy, organisations can maintain version control, increase policy participation, easily obtain employee attestation to key policies and embed a culture of compliance.

The screenshot displays the MetaPolicy web application interface. At the top, there is a search bar and the 'MyCompliance' logo. The main navigation bar includes 'Policy' (with a 'Create' button), 'Response Options', 'Categories', 'Options', 'Related Items', 'Approval', 'Target', and 'Enc'. The 'Policy' section is active, showing a form with fields for 'Name', 'Title', 'Keywords' (with tags for 'Compliance', 'Assessments', and 'Policy'), and 'Policy Author'. A 'Section 1' modal is open, containing fields for 'Title' and 'Description', and options for 'Choose Section Content' (PDF Upload, Custom Text, Linked URL) and 'Policy Date' (Yes/No). The 'Original Policy Create Date' is set to 2023-11-17. The interface is clean and modern, with a blue and white color scheme.

## MetaPolicy: Reduce Risk and Increase Policy Participation

### Employee Engagement

Ensure employee awareness of key policies and enable users to attest directly within the platform. Gain visibility of acknowledgement tracking and add training modules to ensure employees understand and adhere to policies.

### Efficiency and Automation

Automate distribution and tracking to reduce the administrative burden on management. Enable staff to self-manage policies without the need for follow-up procedures and send reminders about important tasks such as sign-offs.

### Awareness and Accountability

Enhance policy adherence by implementing an assessment to confirm that users not only acknowledge policies but also exhibit a clear understanding of their content.

### Organise Your Policies In One Place

Create a single source of truth with a centralised repository for organisation policies. No more scattered documents or spreadsheets.

### Version Control

Keep track of current policies, reduce errors and ensure that policies are consistently up to date across the organisation.

### Provide Regulatory Reporting And Reduce Risk

Demonstrate policy attestation and understanding with the Reporting dashboard, to identify risks and meet the highest compliance standards.

## Key features at a glance

Policy creation

Centralised repository

Easy-to-use interface

Version control

Audit trail

Import policy documents

Automate and segment policy distribution

Microsoft Teams integration

Policy awareness assessment
